PsycTESTS® Product Details

Expansive & Easy-to-Use

PsycTESTS helps researchers easily find scales and measures for their own use by focusing on a collection of instrumentation tools developed for research but not made commercially available. Each record in the database links to at least one additional resource describing the development, review, or use of the research instrument and may include links to peer-reviewed literature, technical reports, or dissertations. When available, PsycTESTS also includes supporting documentation such as instructions, answer sheets, scoring guides, and other materials to help researchers with their testing needs.

High Quality

Each PsycTESTS record is expertly created and professionally indexed by the American Psychological Association, known worldwide for producing high-quality resources for the behavioral and social science community. The indexing employed in PsycTESTS allows for efficient, intuitive searching and browsing, providing detailed results using a variety of customized fields, including construct and research instrument type. Search results can be integrated with other APA databases, offering a unified display for unparalleled precision in discovering exactly what researchers are looking for.

Authoritative & Respected

All of the measurement tools included in PsycTESTS are compiled through a systematic review of peer-reviewed journals published by APA, Hogrefe Publishing Group, and other large publishers; technical reports from PsycEXTRA®; contributions from individual authors; collections from the Archives of the History of American Psychology; and more. Professional indexing with links to PsycINFO® records and available supporting source documents creates a one-of-a-kind, authoritative resource for instrumentation and measurement tools essential to the needs of researchers across psychology and the behavioral and social sciences.

Availability
